60.4 Inbound Recordkeeping - Advance Consist Information (NEW)

Train Dispatchers are responsible for verifying that trains inbound to the BRC, destined for Clearing Yard or outlying yards, have an Electronic Data Interchange (EDI) 418 message prior to being accepted on the BRC.

When trains are offered to the BRC, and the Train Dispatcher does not find a 418 message in the Suspense Inventory for the train symbol, the Train Dispatcher must not accept the train, unless approved by the Manager of Terminal Operations (MTO).
